

### **Internet Sales Workshop - February 8, 2017**

More and more farmers are going on-line to buy and sell livestock or equipment these days. If you are interested on how to go about using your computer to access these internet sales then come and learn at our upcoming workshop at Rocky Learning Centre. Computers and coffee will be provided and you will have the opportunity to learn how to buy and sell cattle and equipment on line either through private sites or through live-streaming of auctions.

### **Extended Winter Grazing Seminar - February 14, 2017**

Please join Clearwater County, Lacombe County, Red Deer County and Grey Wooded Forage Association for an informative afternoon discussing winter grazing systems. We will have experts on hand to discuss various different winter grazing systems such as swath grazing, corn grazing, bale grazing as well as perennial forage systems. We will also have a soil nutritional component which will look at the value of winter grazing systems on the soil.

### **Verified Beef Production Plus Workshop - February 28, 2017**

The new, national VBP+ program includes training and auditing for animal care, bio-security and environmental stewardship along with on-farm food safety practices within the cow-calf and feedlot sectors. Through validating sustainable practices at the primary production level, VBP+ enables producers to publicly demonstrate their commitment to responsible stewardship of both cattle and resources.

By attending this workshop you are on your way to becoming certified as a VBP+ operation which allows you to access Growing Forward grant money as well as giving you marketing options for your cattle by being able to market into the sustainable beef stream. We encourage all beef producers to attend this workshop to help build public confidence in our product as well as maintaining social license.
