

Clearwater County

DUST STABILIZATION IN SUBDIVISIONS

EFFECTIVE DATE: June 1990

SECTION: Public Works

POLICY STATEMENT:

To provide an opportunity to resident of a subdivision, for stabilization and chipsealing of the internal road network.

PROCEDURE:

1. The Municipality will consider providing dust control for subdivisions having a minimum of ten residences where funds are available.
2. Upon application to Council by 80% of the registered owners within a subdivision, Council may proceed with providing an oil base to the public road within the subdivision.
3. Clearwater County will then levy a special benefit tax on each parcel affected by the road improvements to cover the total cost of the materials. Clearwater County will absorb the expense of applying the necessary equipment and labour to complete the task.
4. A combination of Asphalt Emulsion SS1 and Ligno-Sulphonate will be mixed with a two inch base and then chipsealed to provide dust suppression. The workmanship will not be guaranteed by Council.
5. Private accesses to properties within the subdivision may be done at the owner's expense if sufficient materials, manpower, and time is available.
